

Do you have cardiovascular disease (CVD) or chronic kidney disease (CKD), or both?

The persons depicted in this advertisement are models and the images are being used for illustrative purposes only.

ATTAIN-Outcomes is a clinical research study from Eli Lilly and Company. It is testing if an investigational medicine (a medicine being studied) may help treat people with **CVD or CKD, or both**.

Can I join this study?

Yes, you may be able to join the study if you:

- are 50 years of age or older
- have cardiovascular disease (CVD) or chronic kidney disease (CKD), or both

There are more requirements that you must meet to take part in this study. The study team will talk to you about these.

Cardiovascular disease (CVD)

CVD is a term used for conditions of the heart or blood vessels like coronary heart disease (CHD), stroke, and peripheral artery disease (PAD).

Chronic kidney disease (CKD)

CKD is a long-term condition where the kidneys are damaged and do not work properly.
